

UNIT 1.1 Quiz

(Edited version for public review)

1. Sketch a dropper with a large water drop about to fall from it. Then imagine a dropper with soapy water that has a drop about to fall. Once the drops fall onto a table, do you imagine the soapy water drop will be the same or different than the plain water drop? Explain your reasoning.

2. You conducted a water race on wax paper. Explain why you didn't run the race on paper towel. How did water interact with wax paper than with...
